# SPECTRA

Photography is an art of observation. Do you have the artist in you?

Our first ever photography competition, "Spectra" is now going to be a reality.

Everyone sees, but how many observe? Our exhilarating competition is a medium where everyone, whether a professional photographer, an amateur, a passionate one, or even the commonest of people, will all agree on one point: "Photography is an art."

You don't need a professional photographer's camera to be an artist. If you happen to have one, it's not a bad thing either. We provide equal opportunity to both of the above groups to showcase their talent. Are you ready?
